U.S. CENSUS DOMESTIC MIGRATION DATA
REVEALS HEAVY CORE AREA LOSSES
Exodus to the Suburbs and Beyond Continues

January 2006

SUMMARY

This report summarizes US Bureau of the Census domestic (internal) migration in the United States between metropolitan areas, their cores and other areas from 2000 to 2004. It is based upon the latest available county migration information at the data of publication.

The nation's metropolitan areas with more than 5,000,000 population experienced net domestic migration losses of more than 2,000,000 (Table 1). Most of these areas, however, continued to grow from the excess of births over deaths and international migration (immigration). The largest domestic immigration gains were in metropolitan areas with between 1,000,000 and 2,500,000 population and metropolitan areas with from 500,000 to 1,000,000 population (Figure 1). All size classifications experienced net domestic migration gains with the exception of the largest metropolitan areas and areas with between 10,000 and 50,000 residents.

Table 1 SUMMARY OF NET DOMESTIC MIGRATION By Size of CSA/MSA			
2000 Population Over	Domestic Migration 2000-2004	2000 Population	%
5,000,000	(2,017,654)	89,004,686	-2.3%
2,500,000	234,133	30,531,117	0.8%
1,000,000	955,116	51,324,458	1.9%
500,000	227,860	23,174,800	1.0%
250,000	442,129	24,003,844	1.8%
100,000	218,052	24,767,557	0.9%
50,000	13,948	10,496,985	0.1%
25,000	(78,198)	7,644,047	-1.0%
10,000	(34,165)	1,110,248	-3.1%
0	38,779	19,366,860	0.2%
Total	0	281,424,602	0.0%
Calculated from US Bureau of the Census estimates.			

Domestic Migration: 2000-2004
### BY POPULATION OF AREA (CSA/MSA & SMALLER)

Figure 1

HIGHLIGHTS

Core Trends: Metropolitan Areas Over 1,000,000

Despite anecdotal evidence to the contrary, the core areas of the nation's major metropolitan areas are experiencing major net domestic migration losses (Tables 2, 3 & 4).

- Among the metropolitan areas with more than 1,000,000 population in 2000, 43 of 53 cores suffered net domestic migration losses between 2000 and 2004. The total loss among these cores was more than 3,250,000, exceeding the 2000 population of Chicago and St. Louis combined.

- The core counties of the nation's 10 metropolitan areas, all with more than 5,000,000 population in 2000, lost a net 2,177,000 domestic residents from 2000 to 2004 or 6.2% of their 2000 population (Figure 2).

- Nine of the second ten metropolitan areas cores experienced domestic migration losses.

- Among the third ten metropolitan areas, cores experienced net domestic migration increases in five, while five experienced declines.

**Core Domestic Migration: 2000-2004**
TOP 10 METROPOLITAN AREAS (CSA/MSA)

Domestic Migration 2000-2004 x1,000

Figure 3

Figure 4

- Net domestic migration losses were sustained in the core counties of 43 of the 53 metropolitan areas with more than 1,000,000 residents in 2000. Among the top 20 metropolitan areas, only the Phoenix core county gained.

- New York City experienced a net domestic migration loss of 640,000 (8.0%). The cores of Los Angeles and Chicago both lost approximately 400,000.

- The largest core percentage losses were in Boston (-11.6%), San Francisco[1] (-10%), St. Louis (-9.8%) and Denver (-9.7%).

- Some metropolitan with strong infill programs and efforts to gain core population suffered significant core losses, such as Atlanta, Portland, Chicago, Denver and Washington-Baltimore (the Washington loss was somewhat greater than that of Baltimore).

'
Metropolitan Trends: Metropolitan Areas Over 1,000,000

The nation's largest metropolitan areas are losing domestic residents to smaller areas.

- The 53 metropolitan areas with more than 1,000,000 population in 2000 lost 828,000 domestic residents (0.5%) to smaller areas between 2000 and 2004. Declines were registered in 24 metropolitan areas

---

[1] San Jose-San Francisco.

- The 10 metropolitan areas with more than 5,000,000 residents in 2000 experienced a net domestic migration loss of 2,018,000 (-2.3%) from 2000 to 2004.

- Only two metropolitan areas over 5,000,000 gained domestic migration between 2000 and 2004, Dallas-Fort Worth (1.7%) and Washington-Baltimore (0.03%).

- San Francisco suffered the largest domestic migration loss, at 6.4%, followed by New York at 4.2%. Chicago and Boston also lost more than 2.5%.

- Among the second 10 largest metropolitan areas, only Phoenix (6.3%), Atlanta (3.1%) and Houston (1.0%) achieved a net gain in domestic migration.

- Metropolitan areas with between 2,500,000 and 5,000,000 population had a net 234,000 migration gain (0.8%)

- Metropolitan areas with between 1,000,000 and 2,500,000 population experienced the largest domestic migration gain, at 955,000 (1.9%)

- Metropolitan areas with between 500,000 and 1,000,000 population had a net domestic migration gain of 228,000 (1.0%)

- Smaller areas had a net domestic migration gain of 601,000 (0.7 percent).

SUBURBAN TRENDS: Metropolitan Areas Over 1,000,000

Suburban areas generally experienced net domestic migration increases, but were often less than the core losses.

- Forty-six (46) suburban areas experienced net domestic migration increases, while six declined (one, San Diego, has no suburban counties).
- The largest suburban domestic migration loss was in San Francisco, at 379,000 (-6.1%).

TRENDS: ALL METROPOLITAN AREAS

Out of the 729 areas, 329 experienced net domestic migration gains (Table 5).

- The largest numerical gains were in Phoenix, Las Vegas, Tampa-St. Petersburg, Orlando and Sacramento (in order), all of which experienced a gain greater than 100,000.

- The largest numerical losses were in New York, San Francisco, Chicago, Los Angeles, Boston and Detroit, all of which experienced a net loss greater than 100,000.

- The largest percentage gains were in Lake Havasu City, Arizona and St. George, Utah, at more than 15 percent. All of the 19 areas experiencing gains of 10 percent or more were in the South and West, with the exception of East Stroudsburg, Pennsylvania, which has been the recipient of much migration from the New York metropolitan area.

- The largest percentage losses were in Garden City, KS, Pecos, TX, Kodiak, AK, Liberal, KS and West Helena, AR.

NOTES

Combined Statistical Areas (CSA) are used where they exist. CSA's include Metropolitan Statistical Areas and Micropolitan Areas (MSA).[2] Where CSA's do not exist, the Metropolitan Statistical Area (MSA) is used.

Core are the county in which the metropolitan area's largest city is located, with the following exceptions:

Dallas-Fort Worth: Dallas and Tarrant Counties
Minneapolis-St. Paul: Hennepin and Ramsey Counties
New York: All five counties (boroughs) of the city of New York
Tampa-St. Petersburg: Hillsborough and Pinellas County
Washington-Baltimore: Cities of Baltimore and Washington

Suburban counties are all counties in the metropolitan area outside the core.

One metropolitan area (San Diego) consists of only one county, which is considered the core county. As a result, no suburban data is shown for San Diego.
